

# iSCAN e Offline System Quick Start

## Features

OB15-DM

- The Smart phone or tablet requires internal storage 32G or above, and Android 6.0.

## Step 1 : Bluetooth Connection

1. The Smart phone or tablet requires internal storage 32G or above, and Android 6.0.
2. Download the iSCAN-e Offline app from our official website at [www.autolandscientech.com](http://www.autolandscientech.com), under iSCAN-e section.

3. Turn on the Bluetooth feature on the Android device.

iSCAN-e Offline

4. Launch iSCAN-e app, connect the app with OB15-DM via Bluetooth.

(Make sure OB15-DM is connected properly and powered on before Bluetooth pairing. See images below.)

- (1) iSCAN-e system automatically searches and pairs to OB15-DM's Bluetooth to complete connection. For example: The Bluetooth number of this S/N#DM00001CB is "14215F".

- (2) Connection completed.

## Step 2 : Enter Activation Code & Software Download

1. Enter the activation code. There are three ways to active.

(1) Click the OB15-DM S/N at the upper right of the screen.

For example: Click DM000001CB.

(2) Select UPDATE

(3) Select SET UP

And then enter "Online Activation / YUP Renewal"

to enter Activation Code.

2. Start to UPDATE

\*Software download speed varies depending upon internet speed.

## Step 3: Diagnostic Connection

1. Connect OB15-DM to the vehicle with AC-EC5 & OBD-II adaptor.

2. Launch iSCAN-e Offline app, connect the app with OB15-DM via Bluetooth, select [Diagnosis], then select vehicle make.
